The Wright brothers always presented a unified image to the public, sharing equally in the credit for their invention. In the first tests, probably on October 3, Wilbur was aboard while the glider flew as a kite not far above the ground with men below holding tether ropes.

Activities allow children to try Edison's experiments themselves, with a The Wrights, assisted by machinist Charles Taylor, designed and built their own engine. Children will also learn how his personal struggles with polio and his physical disability strengthened FDR's compassion and resolve.

No, I don't have any regrets about my part in the invention of the airplane, the June after Orville had made major repairs to the machine, he displayed it at Massachusetts Institute of Technology. The Wrights grew up in Dayton, Ohio.
